

SECTION 7.

CRIMP GAS INSTALLATION INSTRUCTIONS

The following instructions explain the correct installation procedure for Robusto Crimp Gas fittings in conjunction with Robusto Gas pipe.

	<p>With a set of pipe cutters /shears cut the pipe at 90° ensuring the pipe is square on the end.</p>		<p>Proceed to crimp the fitting until jaws of tool are completely closed.</p>
	<p>Round the cut end of pipe with the rounding tool.</p>		<p>Once crimp is complete test with gauge. Gauge will slide over copper ring if it has been done correctly.</p>
	<p>Push fitting onto pipe until pipe is visible through the viewing port on copper ring. This ensures that pipe has been inserted to the correct depth.</p>		<p>Position tool so that the jaws of the tool are in the centre of the copper ring.</p>
	<p>Position tool so that the jaws of the tool are in the centre of the copper ring.</p>		<p>Once crimp is complete test with gauge. Gauge will slide over copper ring if it has been done correctly.</p>
